Experience

BETTER MANAGEMENT LTD. | WEB DEVELOPER NOV 2017 - JUL 2018

As the sole web developer, worked closely with the marketing team to develop and maintain company websites, sometimes writing custom CMS-like functionality, other times using WordPress as the CMS. Included AWS server management as well as producing graphics and videos.

CEFAR | DEVELOPER JAN 2017 - JUL 2017

Mainly tasked with website development - some powered by WordPress as the CMS. This included setting up development environments and build tools. Working alongside other developers and using version control, we completed many projects to great client satisfaction - fashion websites, e-commerce sites, HTML e-mails, corporate, etc.

AVOCADO | WEB DEVELOPER OCT 2016 - MAR 2017

Worked freelance with Avocado on 2 WordPress powered projects. Both were company websites, they required integration of translation management software, theme updates and, on one occasion, a re-organisation of the website infrastructure. Avocado acted as the designer for these projects, as well as the front for communicating with the clients.

LEEDS ETHICAL HACKING SOCIETY | WEB DESIGNER APR 2016

Created a static web page to stand in for the website still in development for the LEHS. The web page was purely informational and was created using self-configured build tools and version control. This accomplished the need for distribution of information relating to LEHS events whilst their website was being constructed.

NATURPARK PÜRKERSDORF | WEB DEVELOPER OCT 2015 - JAN 2016

Being the only Wordpress Developer in the University led Design team. I built upon a blank Wordpress Theme Template. I integrated Plugins and ensured they fit appropriately to the rest of the website. Communication with the rest of the team was enabled using Git and Bitbucket as the hosting provider.

IWF | WEB DESIGNER DEC 2014 - APR 2015

I was asked to create a landing page which would advertise the services offered by iWF. This page included CSS animations to bring the page to life.

LEEDS BECKETT STUDENT UNION | WEB DESIGNER OCT 2014 - DEC 2014

Worked closely with the resident Graphic Designer to create an effective HTML e-mail template which could be re-used quarterly e-mails. This included hosting a backup web version of the HTML e-mail.
